Sustainable Water Futures: Climate, Community and Circular Economy

Guest Editors:

Prof. Dr. Ataur Rahman

Civil and Environmental Engineering, School of Computing, Engineering and Mathematics, University of Western Sydney, Locked Bag 1797, Penrith, NSW 2751, Australia

a.rahman@westernsydney.edu.au

Assoc. Prof. Abdullah Al Mamun

Department of Folklore, Faculty of Social Sciences, University of Rajshahi, Rajshahi, Bangladesh

mamun@ru.ac.bd

Deadline for manuscript submissions:

30 March 2022

Message from the Guest Editors

Dear Colleagues,

Water is life, and no one can ignore the necessities of water in our life while humankind is facing both global and local water challenges such as climate change, water diversity loss, fresh drinking water scarcity and pollution. The need for sustainable water futures gains momentum as environmental and resource scarcity is increasing due to climate change. The transition and actions to the circular economy could be a nature-positive way of promoting a sustainable water future. Meanwhile, trickle-down economics could be reshaped following a bottom-up approach in the light of doughnut economics and circular economics in reducing the gap between people, water, nature, culture and civic engagement. The innovations and novel research work without undermining the planet by engineers, planners, architects, social and natural scientists could play a pivotal role in keeping positive planetary boundaries. [...]

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

ECOLAB, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Ei Compendex](#), [GEOBASE](#), [GeoRef](#), [AGRICOLA](#), [AGRIS](#), [CAPlus / SciFinder](#), [Inspec](#), and many other databases.

Journal Rank: [JCR - Q2 \(Water Resources\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
